BORE GAUGE (MODEL - 1511 A / B / C)

BORE GAUGE

For the measuring of cylindrical bores.

Reading : 0.1 mm

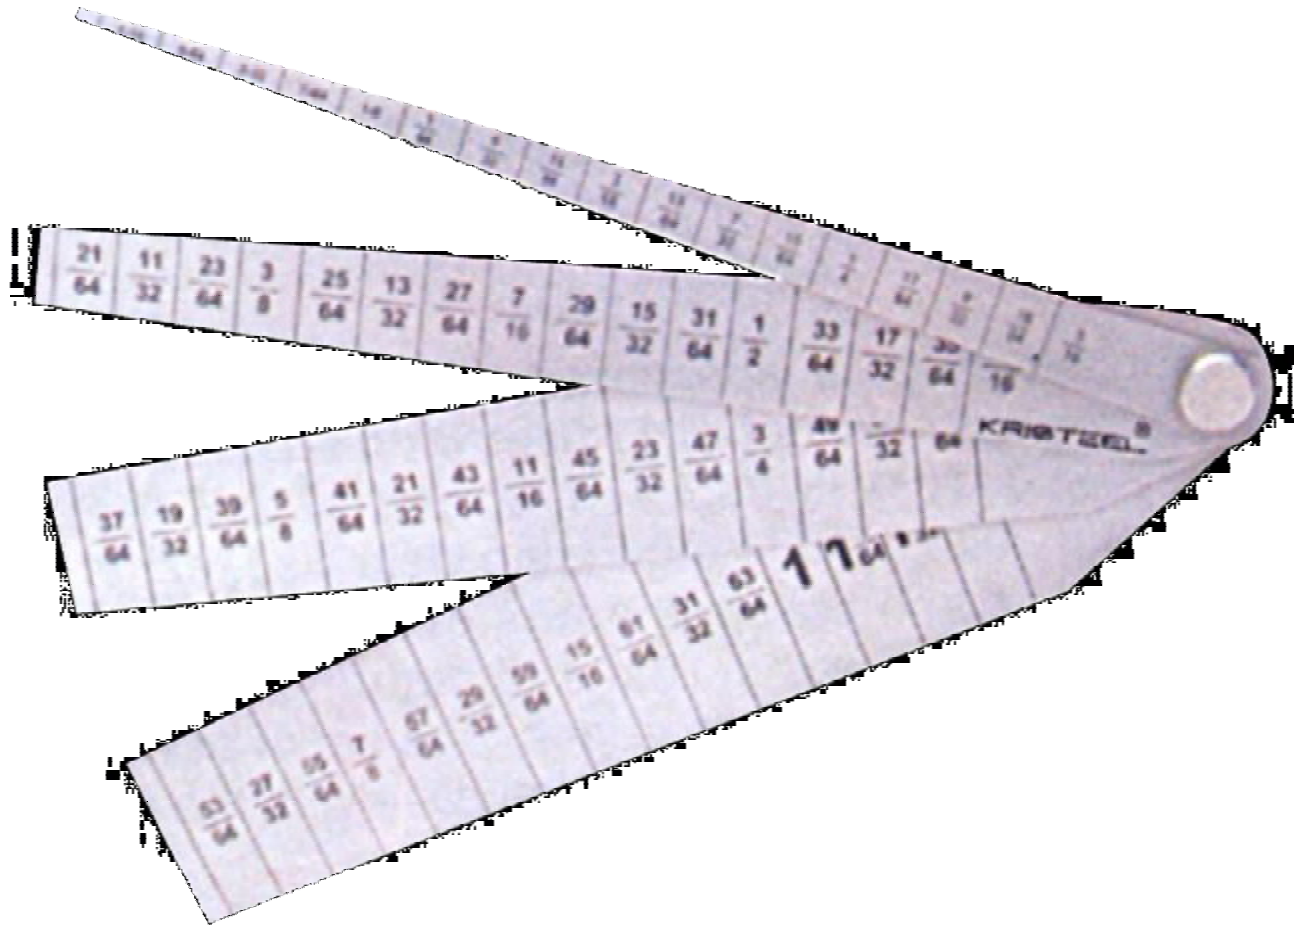

Flat and not hardened

| MODEL | LENGTH |
|--------|----------|
| 1511 A | 1-15 mm |
| 1511 B | 15-30 mm |
| 1511 C | 30-45 mm |

MATERIAL :- Stainless Steel
RANGE :- 1-15 , 15-30 , 30-45 , 45-60 mm
LEASTCOUNT :- 0.1 mm.
FINISH :- POLISHED (OPTIONAL SATIN CHROME)
USES :- To determine the Diameters of any bore, Insert the Bore gauge in the hole to be checked , the point where gauge contacts the bore given the dimension of the hole.
 It measure the dimension from 1mm to 15mm with increment of 0.1mm.
 Also use full gage to check plate gap In welding geometry
 Gauge is packed in PVC pouch.
AVAILABLE MODELS A 1-15 mm
 B 15-30 mm
 C 30-45 mm
 D 45-60 mm.

Bore Gauge (Model 1511 D)

BORE GAUGE

This Bore Gauge has 4 blades each marked with graduation of range 1/16" to 1 1/16". The gauge is used to measure internal bore diameter of cylindrical objects.
